- 🚲 BIKE RIDING
- 🌐 CONTINUOUS LEARNING
- ✈️ TRAVELLING

👔 PERSONAL PROFILE

I am a MERN/Full stack developer. I was borned in the U.S, but now I am living in Buenos Aires, Argentina.

I knew this was my profession since I have started college, in 2020, where I had a go programming and developing applications. At this moment, I am looking for any proyects or employement opportunities where I could perform tasks using my skills to the fullest.

Some strengths I do stand out are my responsibility, consistency and loyalty.

If you wish to know more about me, I invite you to visit my personal website, attached on the left from this document.

🎓 ACEDMIC BACKGROUND

2013-2019	**BACHELOR'S DEGREE IN COUNTING ADMINISTRATION** INSTITUTO FEDERICO DICKENS
2020-2022	**PROGRAMMING SENIOR TECHNICIAN** UNIVERSIDAD TECNOLÓGICA NACIONAL, FRGP
2022-2022	**REACT HOOKS + REDUX + ROUTER** UDEMY
PRESENT	

FEATURED PROJECTS

BUDGE.IT React, Express, SQL Server, Node
Personal budget management application. Organize your expenses and incomes from daily life in a very simple way.
The application has login, search filters and CRUD operations
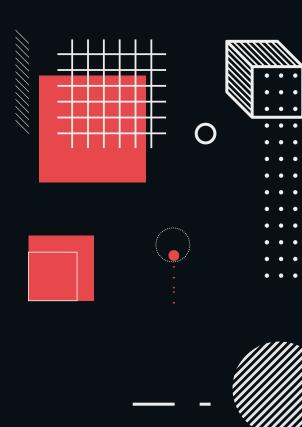

Deploy: https://budgeit.netlify.app/
Repository: https://github.com/sergioriv2/budgeit

New Wave Games ASP, MVC, SQL Server HTML/CSS
In New Wave Games, clients can purchase game keys from different games, whereas administrators have unique functions on the page like CRUD operations and see statics.
The application has login, search filters and other features as mentioned above.

Repository: https://github.com/Goldyr/TP_Final_Prog3/tree/Dev

LEAGUE OF BUILDS C/C++, SFML
CRUD file management application, based on the items and characters from the videogame 'League o Legends'
Includes two types of interfaces: The first is for the terminal, meanwhile, the other is a graphic interface.

Repository: https://github.com/sergioriv2/leagueofbuilds

AMIX C/C++, SFML
A videogame created in less than 72 hours, as a part of a Game Jam.

Find all your friends' items before you lose their friendship for ever!

Repository: https://github.com/sergioriv2/AMIX

DIEZ MIL C/C++,
The famouse dice game 'Ten Thousand' recreated as a terminal videogame. Includes graphic interface, scoreboard, single and two players mode.

Play now and get a ten thousand score as few rounds as possible!

Repository: https://github.com/sergioriv2/Juego_Diez-Mil
